Subject: RE: 8-14-2015 1900 Bullets - Gold King Mine

Good Morning Carl!

Thank you for bringing this to my attention.

The 8-14-2015 1900 bullets say that we have collected approximate 70 samples. I should clarify that we have collected private drinking water well samples at 73 locations. 73 locations, not approximately 70 total samples.

Below is a table showing the number of private water well samples we collected each day and a total count that reflects the resampled wells.

Date:	Number of Samples:	Total Samples:
8/10	20	20
8/11	18	38
8/12	22	60
8/13	20	80
8/13	41 resamples of locations previously visited	39 (80 -41)
8/14	34	73

This table should clarify the number of private water well samples we have taken and the number of locations we have sampled. I will include this table in tomorrow's sit rep.

Good summary. One area that will get more scrutiny will be private wells and I have a problem making them add up. We say we will sample 70 wells total. Then we say that the number of wells we sampled was:

- 30 on 8/11
- 35 on 8/12
- (none ?) on 8/13
- 35 on 8/14, and
- 25 remaining wells on 8/15

So...I get at least 125 wells...not 70.
